## Career Objective:

Love to work with web technologies and make different UI. The initial goal is to make a career as a front-end developer and have a dream to establish me as a full-stack developer.

## Programming Skill:

**Comfortable:** React, JavaScript, Bootstrap, React Router, jQuery, HTML, CSS

**Familiar:** NodeJS, ExpressJS, MySQL, MongoDB, Material-UI, Python, SASS

**Tools:** Git, Firebase, Chrome Dev Tools, VS Code, Sublime Text

## Experience:

Oct 2020- Present

### Intern Software Developer

Pipesort Technologies LLP, **Chennai, India**

- Made responsive UI of different projects according to given design.
- Integrated front-end with given APIs.
- Made data interaction between pages at client side.

## Projects:

**Red Onion Foods** | [Source Code](#), [Live Link](#)

- MERN project for a food delivery service or restaurant.
- Provides different menu for **breakfast**, **lunch** and **dinner**.
- There is a cart holding selected foods and user can customize his cart.
- Built with **ReactJS**, **Material-UI**, **Bootstrap**, **ExpressJS**, **Firebase** auth.

**The Ultimate Traveler** | [Source Code](#), [Live Link](#)

- ReactJS based front-end project showing different travel destination.
- User selects his travel destination and fills the information form.
- User will see hotels at his destination and google map will also be there.
- Built with **ReactJS**, **React Router**, **Material-UI**, **Bootstrap**, **Firebase** auth.

## Volunteer Network | [Source Code](#), [Live Link](#)

- MERN project with real-time database shows different volunteering options.
- User selects any work and register for the volunteering.
- User has his own **dashboard** to see his selected works.
- Built with **ReactJS, Material-UI, Bootstrap, SwiperJS, ExpressJS, Firebase**.

## Creative Agency | [Source Code](#), [Live Link](#)

- Full-stack project with different feature for **software or design firm**.
- User can order a work, review on work, see order condition from **dashboard**.
- Admin can see all order list, add new feature and admin from **dashboard**.
- Built with **ReactJS, Bootstrap, SwiperJS, ExpressJS, Firebase** auth.

## Social Dude | [Source Code](#), [Live Link](#)

- React based web application shows components on screen using API data.
- Calls different APIs, manages data in client side and shows an organized view.
- Built with **ReactJS, React Router, Material-UI, Bootstrap**.
